

ADDENDUM 1

ADDENDUM DESCRIPTION: 470 260001455 REQUEST FOR INFORMATION/RESPONSE

Notes from SETA Offeror's Conference held Via Zoom on January 7, 2026. Meeting attendees: Mario Maslac, Kenji Castro, Victor Han, Richard Davis (all from SETA), Johnna Hensen (E-Rate Consultant) and Matt Cleveland and Mike Pastori (Fidium Fiber). This meeting was for both Data Transport Form 470 260001454 and Internet Access Form 470 260001455.

Johnna explained that this process is for data and internet services to the new SETA site, Marisol Village, that was opened between E-rate funding cycles. The agency would be soliciting separate bids for both services.

Fidium Fiber asked if this was a new data circuit or if it was the data circuit that had already been installed. It was explained that the services requested have already been installed. Mario acknowledged that the first year (2026-27) is being paid out of pocket due to E-Rate timing constraints. The agency is following E-Rate requirements and has posted separate postings to request services for the new school site so they can seek funding for future years. The discussion concluded that bids are being sought for both data transport and internet access with the possibility of amending an existing contract, if awarded to a current service provider.

Fidium Fiber clarified whether they needed an estimate for 1 Gb internet or just a switched ethernet connection. It was confirmed that they could choose to bid internet and/or data transport services.

There were no additional inquiries received during the request for information period.

All other bidding/contract, stipulations, dates and times remain unchanged, in full effect and by reference become a part of this addendum.
